RealDoll will replace the wife American scientists and sexopathology think that people abandon normal sexual relations in favor of the robots in 50 years. The futurologist Ian Pearson predicts that women in 10 years would refuse to have sex with men and will go to robots. However, the sex industry is evolving for the needs of men and today the developer of the robot which imitates the functions of the genital organs of a person stated in the RealDoll as he called his brainchild the California company Abyss Creations will go in the next year. Rubber doll woman jockey will be equipped with responsive touch sensors and buy it will be for 15 thousand
